This article presents some of the top tips and tricks for setting up and photographing the D800 and D800E, and all of them enhance the shooting experience.

The Nikon D800/D800E Setup and Configuration post I made a few years ago has more detail on the settings below download Nikon's D810 manual (free). Nikon's highest-resolution camera is also one of the best pro DSLRs on the market. This $3,300 camera is an upgrade to the company's popular D800 and D800E. The D810 produces very minimal noise (graininess) at low ISO sensitivity settings. The camera also includes manual focus control and the ability to apply focus to the D800 and D800E, though you will have to ignore the new D810 menu items. Again, consult your manual for a full rundown of each option to choose the right Nikon.

In the camera menu, head to the custom setting menu (the option with a yellow flag). Find the Autofocus option under the Custom Setting menu on the Nikon D800. The viewfinder was a disaster for manual focus, with a mirror that was not level with the image. Compared to some of Nikon's earlier cameras like the F6, I felt the D800 had a rather poorly designed viewfinder. The lower settings may be good for long exposures, but as with all DSLRs, offer a range of setting options from automated through full manual. Some DSLR cameras, like the Nikon D4S, D810, D5300 or D3300 allow for 60fps frame rates.

Settings: 1/100th, f/2.8, ISO 3200 Gear: Nikon D800, Nikon 105mm f/2.8 Micro. Learning to shoot in manual mode will give you the most control over your.
